HORMONE TUMOR MARKER ALLERGY TEST PANEL

THYROID

- T3
 - T4
 - TSH
 - FT3
 - FT4
 - Anti - TG
 - Anti - TPO
- } Thyroid
Function Test
- } Anti Thyroid
Antibodies

ANEMIA MARKERS

- CBC
- Vit B12
- Ferritin
- Iron (TIBC) Including Serum transferin
- Folic Acid

ALLERGY MARKERS

- Allergy Panel test
- Immunoglobulin E (IGE)

BONE MARKERS

- Anti-CCP-Confirmation for Rheumatoid arthritis
- Vitamin D - Total (25 Dihydro Cholecalciferol)

FERTILITY PANEL

- FSH
- LH
- Prolactin
- Antimullerian Hormone (AMH) (Ovarian Reserve Marker)

MALE HORMONES

- TPSA (Total Prostatic Specific Antigen)
- Testosterone

TUMOR - MARKERS

- CA 125
- Alpha feto Protein (AFP)

ELECTROPHORESIS

- Serum Protein
- Haemoglobin

MISCELLANEOUS

- B-HCG (Beta Human Chorionic Gonadotropin)
- ANA (ELISA) & ANA BLOT-panel

WHY BLOOD TEST FOR ALLERGY IS BETTER THAN SKIN PRICK TEST

Blood tests measure the amount of IgE antibody to a specific allergen circulating in the blood. The test is carried out on sample of blood, usually taken from a vein in the arm in the usual way. Allergy blood tests look for substances in the blood called antibodies. For negative results, the levels of immunoglobulin E (IgE), a type of antibody, are the same as in a person who does not have allergies. For positive results, the levels of immunoglobulin E (IgE) Antibodies for a particular allergen or group of allergens are above the normal level.

*First Lab in Mysore to introduce Turn Around Time (TAT) Concept - (100 Min.) for the above tests

* Conditions Apply ** Out Sourced
